

QuickBooks®

Would being able to automatically create entries in QuickBooks for TireMaster POS activity lighten your bookkeeper's workload?

With the Accounting Interface for QuickBooks, you can cut the number of manual journal entries your bookkeeper needs to make. This utility scans TireMaster POS for a day's sales, accounts-receivable, and inventory receiving data. Then it generates a batch of entries that can be exported to QuickBooks.

Your bookkeeper no longer faces the chore of poring over document after document to come up with transaction totals and the tedious task of making journal entries for those amounts by hand. With the interface, TireMaster entries are displayed in a list and can be verified before they're exported to QuickBooks. Paying vendors is easier too. When entries for inventory receivings post to QuickBooks, bills are created automatically.

In addition to contributing to an efficient workflow, the Accounting Interface for QuickBooks prevents bookkeepers from transposing numbers, posting entries to the wrong accounts, and making other errors.

TireMaster and QuickBooks help you:

- Reduce manual data entry
- Decrease bookkeeping errors
- Research transaction details
- Work efficiently
- Improve the accuracy of your financials

For more information about using QuickBooks with your TireMaster POS system, call **800-657-6409**, email info@asatire.com, or visit www.asatire.com.

"I used to spend an hour or two on data entry alone. Now I can post my TireMaster POS transactions to QuickBooks in just a few minutes."
