

Inventory Control

Your inventory is your most valuable physical asset. It's not just what you sell but what you buy that can make the difference in your profitability. Keep track of your inventory levels, what your team has committed to customers, what is on order, when shipments are arriving and movement trends with ASA Tire Systems' TreadX Inventory Control Module.

| Item Number | Description | Available | Pending | Price | Unit | Cost | Days | SP | Exp |

What's stopping your business from managing your inventory properly?

Barriers

- Lack of complete information creates "best guess" purchasing decisions
- Store managers tasked with manually requesting restocking of inventory
- Can't easily identify slow moving/old inventory
- Unable to identify causes of inventory shrinkage
- Countless vendor programs make tracking true acquisition cost difficult
- Price changes too time consuming
- Salespeople must call other locations to verify product availability

TreadX Breakthroughs

- Recommended purchases based on historical trends and desired inventory turns
- Control inventory levels with automatic restocking by location, based on user-defined parameters
- "Red-line" reports notify you of slow moving inventory
- Complete tracking of inventory movement, including transfers and current status
- Vendor program tracking automatically lets you know true acquisition cost including all discounts and bonuses
- Automatic electronic price updates are a breeze
- Real-time stocking levels for all locations available to each user

The TreadX Inventory Control Module provides convenient on-line tracking of all of your inventory activities. You'll have the information to buy the right product at the right time and at the right price, maximizing your inventory turns and freeing up capital for other investments.

"We can't seem to find the right mix of inventory. We are overstocked in too many items, and we're losing sales on items we don't have."

Additional Inventory Control Features

- Point of Sale update of inventory from your most recent sale, including orders in process, for all locations
- Define by item whether DOT# required at the point of sale
- Unlimited pricing levels for retail, commercial, wholesale and key dealer accounts
- Handheld units for physical inventories, including cycle counts
- Re-order program includes all backorders in calculations
- Automatic price change utilities
- Complete costing and evaluation of all inventories
- Accurately handle backorders
- Automatically calculate, track and report on all adjustments
- Ability to “red-line” slow moving items for quick inventory clearance
- Inventory transfers tracked from request through receipt, with exception reporting
- Add-ons such as road hazard warranties and shop supplies increase profitability

The screenshot shows the TreadX software interface. At the top, there's a menu bar with options like 'File', 'POS', 'CE', 'AR', 'IC', 'PR', 'Help'. Below that, there are several tabs and buttons for navigation. The main area displays a list of items with columns for Item Number, Item Description, Available, Pending, Price, FET, Add On, Cost, Gross Profit, SP % and Split. Below the list, there are sections for 'Quote' and 'Price Code' with various input fields and buttons like 'Add to Order'.

| Item Number | Item Description | Available | Pending | Price | FET | Add On | Cost | Gross Profit | SP % | Split |
